Clust-R-Snax®

CLUSTERS AND GRANOLAS BUILT TO STAND OUT

Today's consumers read labels, seek functional benefits, and expect every product to deliver on both taste and nutrition. For food manufacturers, that means every ingredient has to work harder to create texture, flavor, and health benefits while meeting evolving consumer expectations.

CLUST-R-SNAX

CII offers **Clust-R-Snax**, a fully customizable range of clusters and granolas designed to help brands differentiate on the shelf, hit nutritional targets, and keep consumers coming back.

Built around whole grain oats, Clust-R-Snax can be formulated with any flavor, inclusion, or ingredient you need to create the crunch you want. Panning happens in the same facility. Coating clusters and granolas in chocolate, yogurt, and more creates an added sensory experience.

KEY FEATURES

- Fully customizable flavor, texture, ingredient inclusions, and size
- Ability to incorporate CII inclusions for unique profiles
- BRC-certified, Kosher, and certified organic options available

CII® FOODS
Innovation For Better Food

APPLICATIONS

Clust-R-Snax is designed to perform across a wide array of finished product categories as inclusions, toppings, or standalone snacks.

CUSTOMIZATION

Our R&D team works with you directly to build the cluster or granola you want. Come with a target nutritional profile or start from scratch. We bring our formulation and manufacturing expertise to support your product goals.
